WORK EXPERIENCE

Pixmove

DevOps engineer

Jul 2025 - Present

- Developed and maintained various internal Ansible collections
- Built logging, metrics, and alerting infrastructure
- Administered a Kubernetes (k3s) cluster
- Developed reusable Helm libraries
- Maintained CI/CD pipelines

Higher School of Economics

System administrator

Dec 2022 - Jun 2025

- Administered a Linux server for a university laboratory hosting web applications
- Containerized existing workloads
- Helped developers transition to the new deployment workflow
- Developed several public web tools

toOlympus

Clojure developer

Dec 2019 - Aug 2020

- Developed backend REST API logic
- Maintained an existing codebase
- Implemented unit-tests

EDUCATION

Higher School of Economics

Fundamental and Computational Linguistics

Jul 2025

Studied natural language processing (NLP), data analysis, machine learning and theoretical linguistics. Developed a morphological parser for the Shughni language as a bachelor's thesis project.

SKILLS

- Containers and Orchestration: Docker, Kubernetes (k3s), Helm
- Infrastructure as Code (IaC): Ansible, Terraform
- Monitoring: Prometheus, Grafana, Vector
- CI/CD: GitLab CI, Werf
- Operating systems: Linux
- Programming: Python, Rust, C++
